

PROPERTY RESTORATION

Case Study: Saints Cyril & Methodius Catholic Church Shiner, Texas

Loss Event: Hurricane Harvey

Damage: Storm and Structural Damage

THE PROBLEM

When Hurricane Harvey slammed into the Texas coastline, the historic Saints Cyril & Methodius Catholic Church in the small community of Shiner, TX, received significant damage to the church structure, nuns' quarters and Shiner Catholic School. Originally built in 1892 and listed in the National Register of Historic Places, the church and school provides important spiritual and educational growth to more than 900 families in the parish family.

THE SOLUTION

Through a relationship with Catholic Mutual Group, the church's coverage provider, BELFOR Property Restoration was called in to complete the reconstruction and restoration efforts:

- The church received damage to the steeple roof and cross as well as the interior of the facility. From the ground to the top of the steeple, it is 149 feet high. It took eight weeks to install the scaffolding. The steeple roof had asbestos roofing materials removed and replaced with a new copper roof, gutters and downspouts.
- The roof on the nuns' quarters was also damaged.
- The school received damage to the roof, multiple classrooms and hardwood flooring. The gym also had window damage.

As the result of the storm-related repairs, the church and Catholic Mutual decided to retain the services of BELFOR to complete exterior restoration of the church. This restoration includes:

- Installing new brick where compromised and resurfacing brick;
- New caulking for all doors and windows;
- Grinding and installing new mortar joints (50 to 75% of the facility);
- Grind, clean, and repaint all cast stone on the church;
- All windows will receive new plexiglass covers;
- Metal louvers will be sandblasted and painted; and,
- Exterior of church will be power washed and sealed.

THE CHALLENGES

- Protecting and restoring the historical integrity and architectural significance of the property.
- Safety -- working in triple-digit Texas summer heat atop a huge amount of scaffolding made this project extremely dangerous.

"This is our parish and its beauty and its history is also ours. There hasn't been this level of work done at the Church and School for 40 years. We must maintain the legacy of our Parish and school."
